Milestone 1

Problem

The current travel and post-travel process at BISU involves multiple manual steps, heavy paperwork, and coordination among various offices (College Secretary, Campus Secretary, Budget Officer, Campus Director, Cashier). This creates delays, especially for prepayment processing, risks of lost or misplaced documents, and high workloads for secretaries when consolidating travel for multiple participants.

Proposed Solution

The BISU Digital Travel and Post-Travel Management System provides a reliable digital record of travel documents and their progress, supporting faculty and administrative staff by ensuring documents are tracked and accessible throughout the process.

Milestone 2

Analysis and Design

The current BISU Travel and Post-Travel Management System keeps track of all files on hard copies with a chance of getting lost during submission or lost untracked. Our system is designed so that each travel request automatically gets its own folder on the system, where faculty can upload all the necessary documents like the travel order, itinerary, and receipts. This makes it a backup file in case they lose it, find documents when needed , and keep the process organized.

Evidences

Write or place pictures of evidence gathered during the interview (e.g., forms, summary of interview answers, policies/standard operating procedures, observations of how the process is done) with your proposed client.
